

# Exploring Dormant Gold Projects

December 2021

NewOrigin Gold looks to build on significant historical geological knowledge, to unearth the next major discovery in Canada.

1.

Science and Tech based approach to exploration

2.

Focusing on high-grade multi-million-ounce gold deposits

3.

World Class Mining Camps

## Key Financials

- Shares Outstanding: 51.7 M
- Options: 4.2M
- Warrants: 21.9 M
- Market Cap: ~C\$5.87 M
- Cash Position: ~ Approx. C\$800k
- New Significant Shareholders:  
**Osisko Mining, O3 Mining**

## SHAREHOLDER BREAKDOWN

## New Management and Board

**Andrew Thomson, CEO and Director**

*Currently President and CEO of Palamina Corp.*

**David Farquharson, President**

Has been involved in the investment business for over 20 years. He began in research, focusing his attention on junior oil and gas companies, recognizing undervalued, high growth companies

**Brian Jennings CPA, CA, CFO**

*Over 20 years of financial experience, 10 years of which as a CFO or on the board of public companies.*

**Robert Valliant, PhD., Chairman**

Co-founded and listed NewOrigin Gold (formerly Tri Origin Exploration) on the TSX Venture, founded and listed TriAusMin on ASX and TSX.

**Elijah Tyshynski, Lead Director**

Two decades of experience in international capital markets as a structurer, trader and portfolio manager.

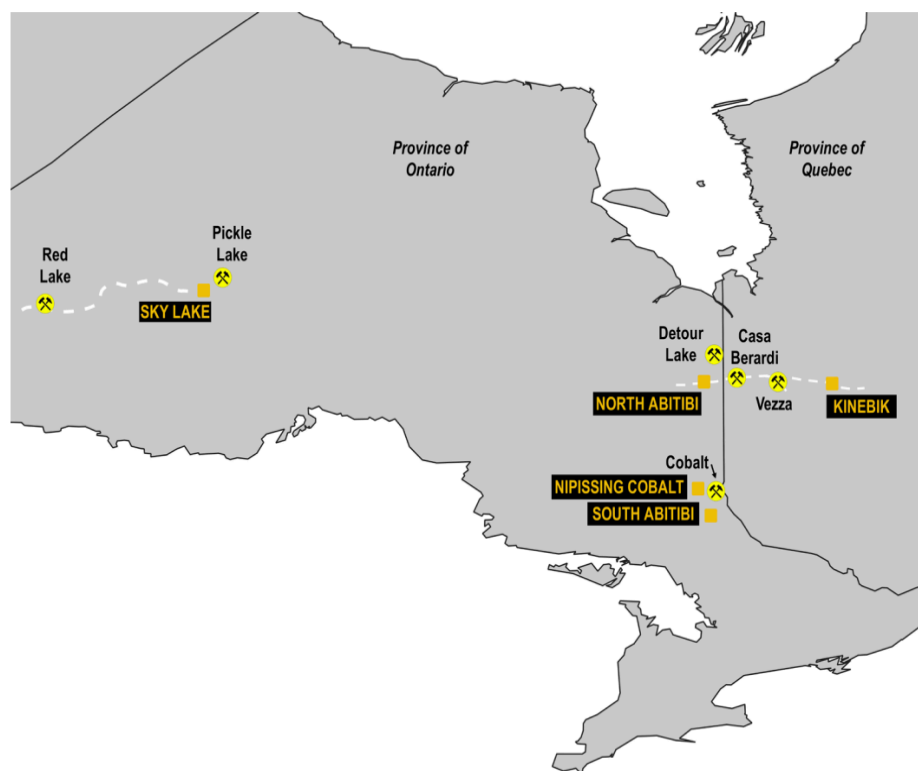

**J.P. Janson, Director**

*Former Managing Director National Wealth Management with Richardson GMP and CIBC Wood Gundy*

**Alexandria Marcotte, P. Geo., Director**

*Currently Vice President, Project Coordination for Osisko Mining Inc.*

## STRATEGICALLY LOCATED GOLD PROJECTS

NewOrigin Gold holds four properties in Ontario, and one in Quebec. The Company looks to advance these properties through drill discovery phase to un-lock their full geological potential with a technical, science first approach. The Company is focused on further delineating and expanding gold zones at its Sky Lake and North Abitibi Projects, while advancing its other projects to the drill stage through additional field work or pursuing JV's or earn-in option agreements.

### Sky Lake:

- Initial planning for a 2021 drill program significantly delayed due to permitting issues in Northern Ontario
- Received drill permit on December 7th, 2021

### North Abitibi:

- Completed an 1,875 metre diamond drill program with core samples submitted to the lab prior to year end- assays pending
- Drilling tested 3 gold-bearing zones at depths below previous drilling

### South Abitibi & Nipissing Cobalt:

- Conducted a field survey in the spring of 2021 focused on mapping and sampling known gold, copper and nickel occurrences

### Kinebik:

- Completed an airborne geophysical survey
